

Directions for use:

Print out, cut along the boarder and dotted lines.

Slot the cut out circle onto the headrest support pole of the vehicle so your child's reward chart is clearly visible.

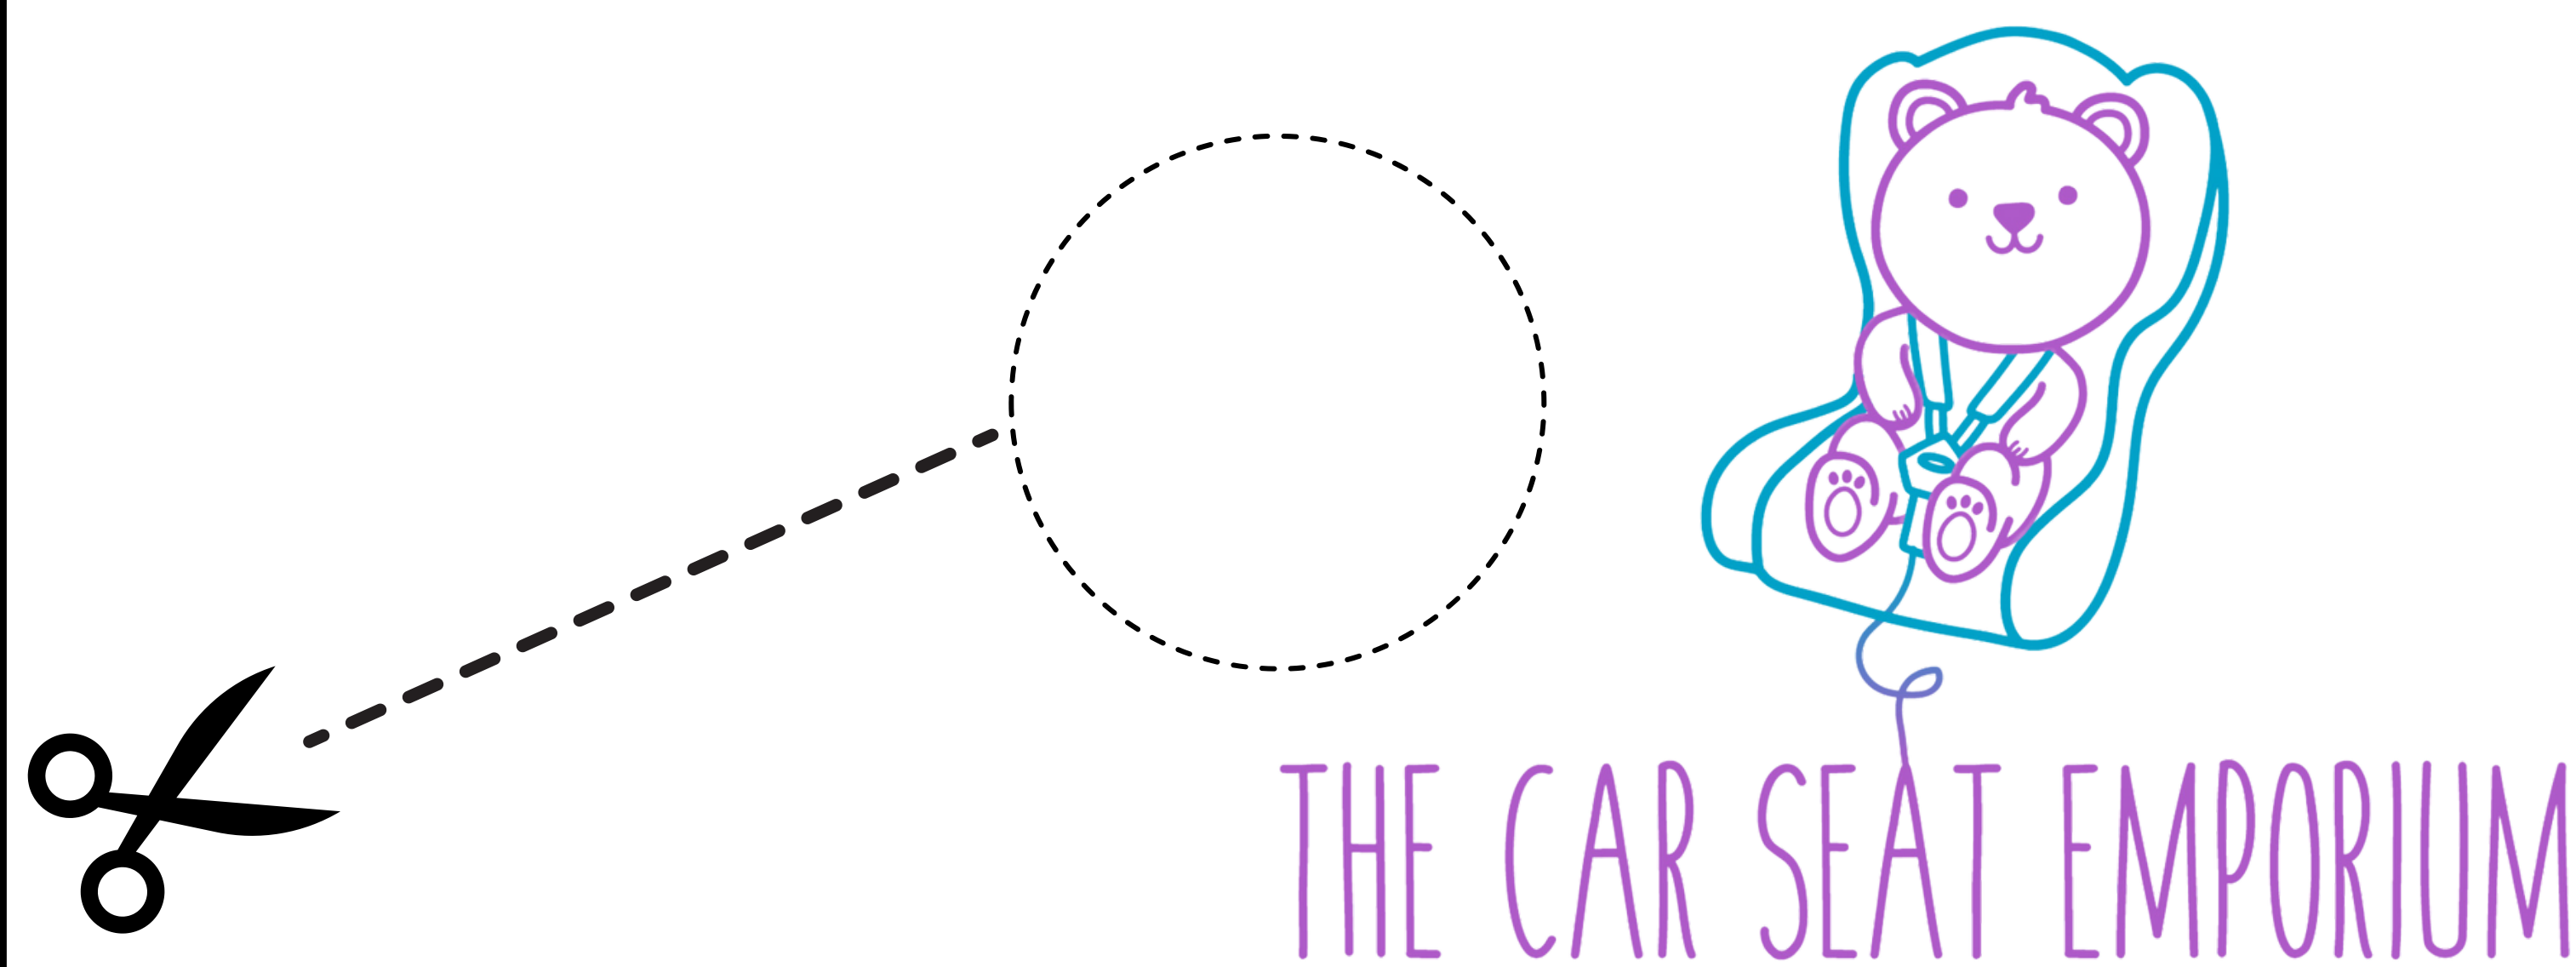

Extend the lifespan of your reward chart by laminating it and using reusable stickers that are easy to remove.

Top tips to remember:

- Max out your car seat limits - use your car seat for as long as the height/weight limit allows.
- Check the orange sticker on the car seat for the height/weight limits.
- **Harness height:**
  - Rear Facing: Level with or just below (max 2.5cm) the shoulders.
  - Forward Facing: Level with or just above (max 2.5cm) the shoulders.
- Headrest- Ears must never hang below or stick out above the headrest.
- Seatbelt installations always require correct seatbelt routing. Ensure the routing is as per the manual and there are no twists in the seatbelt, pull out all slack for a tight fit.
- ISOFix always installs with an additional point of contact (either Top Tether or a Support Leg)
- Always do the pinch test to ensure the harness is tight enough.
